

Founded in 1912, ALBtelecom is the country's biggest fixed line operator providing mobile voice, internet access, IPTV and information technologies.

ALBtelecom's main priority is customer care and application of technology innovations. The target of the company is to provide contemporary services to Albanian citizens and to transform Albania into the main center of information technology and telecommunications in region. ALBtelecom is, through Albanian Internet Exchange Point (AIXP), the first and the only in the region that enables a faster and cheaper internet.

The application of this technology opens the way of country towards digitalization and application of latest services.

ALBtelecom has the potentiality to provide and adapt the ideal solutions to business sector and domestic enterprises, starting from professionals, medium or large businesses, public and private sector, through fixed telephony service, ADSL internet service, Dedicated Internet Access, Intranet, ISDN service, Leasing Optical Fibers, LAN Connection, etc.

ALBtelecom is one of the most important investments in telecommunications of Çalık Holding, which operates in over 22 countries in other industries such as: energy, construction and real estate, textiles, mining and finance. In addition, Çalık Holding is currently operating in a new field after the establishment of Çalık Digital company, in 2017.
