

PROLOG - Estonian Supply Chain Association, Tallinn, Estonia (EU).

PROLOG- Estonian Supply Chain Association (PROLOG), Tallinn representing Estonian National Single Window Consortium (ENSWC).

We offer digital solutions and consultations in the field of logistics, transport and supply chain management.

Estonian National Single Window Consortium (ENSWC) representing companies providing digital logistics solutions and services connecting private sector and public authorities with purpose to make logistics and transport fully digital and paperless (ports, airports, railway and road transport service providers, factories, warehouses, customs, police, border crossings, etc.)

PROLOG is a non-government and non-profit organization that unites private SCM specialists and various companies who see competitive edge in professional supply chain management. Prolog is a member of the International Federation of Purchase and supply Chain Management (IFPSM). PROLOG is the vital link to Supply chain professionals worldwide and leader of digitalization logistics in Estonia.

ENSWC members represented by PROLOG has been providing consulting and system developing services to Trade Corporations, Governmental organizations and institutions (Tax Authorities, Ministry of Finance, Port Authorities, etc.) for European Union Member States, financed by private sector, governmental structures or European Union foundations.

PROLOG is supply chain management competence center providing various consultancy services to public and private organizations. Prolog is developer of the professional education standards and we are occupational qualification provider in the supply chain management area.

Established in 2000 in Tallinn as NGO, PROLOG is competence center delivering services in Supply Chain to increase transparency, efficiency and competitiveness. It has been providing a range of short to long-term consultancy services through the use of international and national experts who participate in missions, projects, programs, and studies.
