

**Ms. Natalija Gelvanovska**, from World Bank Digital Balkan Highway, talked about the connectivity benefits, which are already known most importantly during this pandemic days with people trying to keep their job expect economy loss because of COVID-19 situation.

**Ms. Ersida Docaj**, from Banking-Information & Communication Technologies, during her speech highlight that the more research we do, the more we see connection between connectivity and economy and offline is going online with e-commerce, cloud, IoT and every aspect of life is going online.

**Mr. Denis Benoit**, from European Investment Bank (EIB), pointed out the contribution of Connectivity in GDB, integration, social, resilience etc.

**Mr. Peter Veil**, from Deutsche Telekom, during his introduction in this session said that the most important thing to do next is that we need to be more trustful, transparent and that their focus is in the infrastructure.

**Ms. Fjolla Restelica Ahmeti**, from Kosovo\*, made a presentation for the digital transformation through the “Kode Project” from defining white areas which don’t have digital infrastructure and covering them with high speed Internet.

**Mr. Ömer Kuyucu**, from ALBtelecom Albania, said that the cooperation between the government, private sector and the public is very important. This pandemic has changed the way we should offer services and make new investments plans because people are searching for new services: online shopping, e-learning, high speed connection from all the people who can work from home.

In the end all the panelists discussed again related to projects where they pointed out the collaboration between private sector, public and the government. To structure all the infrastructure projects the right way and to invest more so even though the late investment returns it is important because we would have economy growth.
